Machine Learning (CST-316)

Assignment-1 Set-4

Attempt All Questions on A4 Sheet. All Questions carries equal Marks.

Q1. Categorize Supervised and Unsupervised Machine Learning algorithm domains with an Example.

Q2. Differentiate Machine Learning Errors with their types and give an example.

Q3. Write short note on Clustering and Bayesian inference.

Q4. How do you handle missing or corrupted data in a dataset? Explain with an Example.
